## THE WORLD'S FASTEST CAFÉ

---

The Concordia Presto is the latest innovation in fully automated premium coffee execution from Concordia Beverage Systems. In one compact unit, you can sell all the tasty beverages your customers love – including espresso, lattes, mochas, and even iced beverages. At the fraction of the cost of building, staffing, and operating a café, the Presto is an ideal way for coffee roasters, managed foodservice operators, hotels, and other high volume venues to provide high-quality espresso beverages.

### Plug in and go

The Presto is a fully self-contained unit that takes up less than 10 square feet of floor space. It includes a state-of-the-art touchscreen-user interface, a built-in high-capacity refrigerator, cup dispensers, and storage space for extra supplies. It fits through a standard doorway and set-up takes no time at all- simply connect to power, water supply, and a drain and the Presto is ready to begin serving premium beverages.

### No barista required

The Presto can run 24 hours a day unattended, with no additional staffing requirements. Customers simply select their drink using the Presto's streamlined touchscreen interface, and in 30 seconds they are enjoying barista-quality drinks. Concordia's renowned automated cleaning process takes only 10 minutes a day.

### Proof is in the cup

The Presto brews high-quality drinks like the kind you'd get from a well-trained barista-including lattes, mochas, Americanos, iced drinks, and more. Our patented EspressoJet™ Flavor System infuses syrups directly into milk for flavored beverages, and with 6 flavor options included the Presto can make over 1,000 drink combinations. Concordia can program drink recipes to your exact specifications, including grind, extraction, temperature, and milk consistency, so you can ensure your customers receive the quality beverages they deserve.

## You've got options

### PUT YOUR BRAND IN THE SPOTLIGHT

You've invested a lot in building trust for your brand. Put that trust to work with a customized Concordia machine that represents you. There's an infinite number of ways we can create a customized brand look for your machine, including colors, signage, and the touchscreen interface.

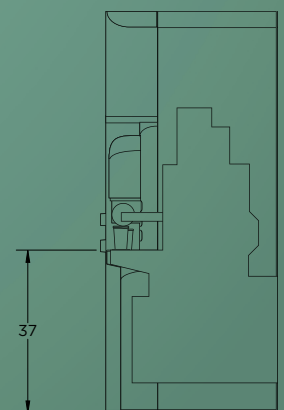

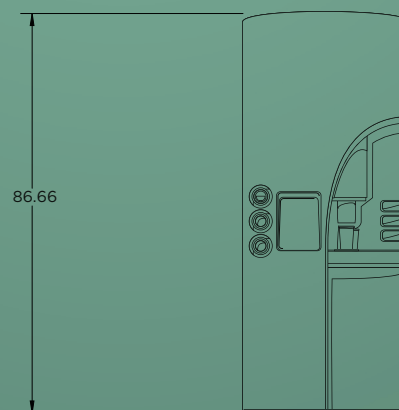

### VENDING

Our complete transaction system can accommodate both credit and debit cards with real-time authorization.
