

Integra 1

Flavor... Automatically

The Concordia Integra Beverage System 1 allows you to expand your beverage menu beyond basic espresso drinks. In a single step fresh beans, fresh milk, and premium chocolate sauce combine to create consistently world-class mochas and hot chocolate. You don't even need to move the cup. The I1 delivers a broad menu of cafe-quality beverages all in a single device; americano, hot chocolate, latte, mocha, cappuccino, espresso shots... even iced drinks. In addition, the new Integra product line offers an optional steam wand for attended locations.

Expand your beverage offering!

Flavor Infusion

Patented EspressoJet Flavor System™ infuses fresh chocolate sauce into the milk during the steaming process. Syrup portions are controlled to your recipes.

Easy to use touchpad

The exclusive picture based touchpad makes it easy for self-serve users to produce drinks at the touch of a button.

On-board refrigerator

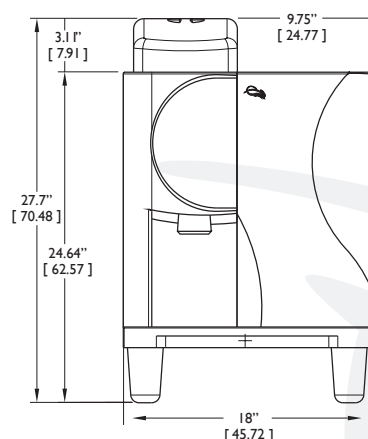

Built-in refrigerator holds fresh milk in a standard one-gallon container.

Water: Min 30psi, Max 100psi, 25 gallons per hour flow
Drain: 3/4in indirect drain

The Concordia I1 offers a full café menu in one compact system. The I1 replaces multiple machines saving both space and cost. Menu options include americano, espresso shots, latté, cappuccino, mocha, hot chocolate & hot water for teas. The I1 even makes sensational iced drinks. You simply fill a cup with ice, press the cold drink button, select your drink - and the I1 does the rest. The EspressoJet™ Flavor System steams premium chocolate sauce directly into the milk in Concordia's proprietary, and patented process. The flavor is "infused" into the beverage and won't settle to the bottom of the cup. The I1 also features two grinders so you can expand your beverage offering. As with all Concordia systems the I1 is tested and certified by NSF.

**With the Concordia Integra 1 it's no longer about espresso machines
It is about saving time, space, and money while satisfying customer drink preference**

Self Serve-Simple to Use, The Most Reliable Espresso Systems in the World

Fresh beans, fresh milk, fresh chocolate sauce; everything needed to make outstanding beverages is built right into the I1. Your customers just choose their drink and press a button. The I1 does the rest, in one simple step, with no training required. The simple cleaning process takes only about 10 minutes a day, and the entire Integra product line is designed for simplicity and reliability.

Quality Beverages

Since you are in charge of portion control, your beverage menu can now taste the same in San Francisco as it does in Boston. The computer controlled grinding and extraction process is programmed to your specifications, insuring that every beverage is created the same each time the button is pressed. The temperature and consistency of the milk is also computer controlled, and set to the type of beverage selected. Fresh chocolate sauce portions are programmed to your specifications and precisely measured for each beverage combination. Espresso, steamed milk, and flavors are poured simultaneously, at just the right time, so perfect cappuccinos, lattés, and mochas are made without moving the cup. The new Integra series also offers a steam wand option for preparation of soy, egg nog, or other specialty drinks.

Profitability

Put it all together...a single beverage solution, simple to use, no complex training, consistent café quality beverages, no wasted milk or syrup, portion control, reliability, and productivity. It all adds up to happy customers and increased profits for your business.
