DD1EL61VRL/S	Vibrating	no	Water line	1450 W	397x415x290	Shiny stainless steel

DD1 EL series is composed by 3 groups

DD1 EL coffee machine is equipped with a completely removable and easy to clean water reservoir, while water pipes arrive directly to the frontal water tray. Clean water in overpressure is conveyed into the 1,5 /2,0 liters reservoir. The particularity of this model, the only one equipped with reservoir, is visible from its shape: the group is external, the manometer indicates the boiler pressure and it has a SOUND gauge TO INDICATE THAT WATER HAS FINISHED and a water softener filter with 500 coffees autonomy.
