

Omega DD2 Eco-Power

- Watt/Volt/Hz: 1600W + 1600W / 220V / 50 Hz - 1600W + 1600W / 120V / 60 Hz
- Shell: Shiny or Star stainless steel
- Taps: Big
- Pipes: Stainless steel
- Manometer: 2 scales dia 60 2,5:16 bar
- Distance between groups (interdistance): 200 mm

Model	Pump	Grinder	Water connection	Total power	Dimensions HxDxW	Shell
DD2EPVRL	Vibrating	no	Water line	3700 W	397x415x470	Shiny stainless steel
DD2EPVRS	Vibrating	no	Water line	3700 W	397x415x470	Star stainless steel
DD2EPRRL	Rotating	no	Water line	3700 W	397x415x470	Shiny stainless steel
DD2EPRRS	Rotating	no	Water line	3700 W	397x415x470	Star stainless steel
DD2EPMCRRLL	Rotating	yes	Water line	4100 W	580x415x660	Shiny stainless steel
DD2EPMCRRS	Rotating	yes	Water line	4100 W	580x415x660	Star stainless steel

With this model we arrived to a professional machine equipped with two supply groups, with a very capacious boiler, with Power function for steam and Eco function. This function halves immediately the boiler energy consumption, deactivating a resistance to maintain water warm when the machine is in stand by. This function guarantees energy power save while maintaining the machine ready to be used.

Eco function is used during the daily inactivity or partial activity periods to reduce the maximum absorbed power while maintaining the optimal temperature unchanged. Omega DD2 Eco-Power model is available in the version with rotating pump or vibrating pump. The rotating motor is silent and "eternal", thanks to its capacity and to the pressure capacity.

The version with two vibrating pumps presents the advantage to be able to acquire water directly from any container (for example sterile water container) and discard in another container, positioned under or near the machine. For both the models it is possible to choose the combination with coffee grinder, deciding to position it whether left or right, or to add it in a second time. The coffee grinder design is the same as the family one, so to be fused in a unique body to the selected machine. By this model we thought to offer a solution to restoration or catering activities, which need a professional coffee machine but has just one power socket (for example in case of outside buffet or in places far from kitchen or bar).

This model is equipped with the useful water tray, removable and completely realized in stainless steel AISI 304.
