- MCΩS (STAR)

## Characteristics:

- 1/3 HP
- 1400 g/min
- 120V / 60 Hz
- mills diam. 63,5

Omega grinder is the grinder created for the Omega series of De Domenico coffee machines. Omega grinder presents the same design of the coffee machines, sharing the wiggly lines and the shiny steel color. The shell is totally made in stainless steel AISI 304, which gives both manageability and solidity. Combining Omega grinder with De Domenico coffee machine means creating a perfect union, both from aesthetic and practical side. On demand, Omega grinder can be integrated or simply positioned on side of the coffee machine, depending on personal taste and professional needs.
