

PURA PRONTO

C 2M 2P H W

Five dimensions of simplicity to let your business prosper; ease of use, ease of enjoyment, ease of maintenance, ease of flexibility and ease of doing business. The Franke Pura is simplicity itself when it comes to coffee making. The concept behind the coffee machine simplifies beverage choice and enhances overall ease of use. The Pura also offers exceptional value for your money.

The greatest product diversity with the highest product quality, coupled with an amazing simplicity in operation and maintenance make the Pura the ideal machine for family dining, fine dining, office environments and hospitality.

FRANKE

FEATURES & BENEFITS

PURA PRONTO - DELICIOUS COFFEE CREATIONS WITH POWDERED MILK AND CHOCOLATE The Pura Pronto lets you make coffee creations in a brand new dimension with powdered milk and chocolate. The machine prepares two different powders using the innovative Twist+Taste Technology. These are prepared in two separate mixing chambers, preventing tastes from being mixed. Press a button, and seconds later you get the finest milk-based froth that tastes just as good as if it were made with fresh milk. The dual powder dispenser for milk and chocolate powder is located between the two bean hoppers. Both containers are easy to remove for filling and cleaning. The advanced cleaning concept ensures the highest standards of cleanliness.

Commercial range for Pura: up to 150 cups/day
